

AERODROME CHART (AI)

ADDITIONAL INFORMATION

- Pre-taxi clearance is available for up to 1 hr prior to departure. Pilots will receive clearance validation or an amended clearance when ready to taxi. Pilots must ensure that they have received clearance validation prior to take off.
- Expect ALL IFR departures to be assigned a SID that corresponds to the requested departure runway. Pilots are to be familiar with both the ALREX and ITRUS SIDs in case of a short notice change in the operational runway.
- Transient operators should familiarize themselves with receiving aerodrome advisory services as opposed to an aerodrome control service. Aerodrome advisory services (AAS) are primarily intended for the arrival and departure phases of a flight to an aerodrome within a Mandatory Frequency (MF) area, and for transit through an MF area, served by a Flight service station (FSS). AAS is provided on the MF. Mandatory reports by aircraft on the MF are critical for the FSS to be able to provide effective air traffic information. Additional details regarding AAS and MF are available within the TC AIM.
