

ILS Z RWY 16 OPS SPEC

RESTRICTED INSTRUMENT PROCEDURE

This procedure requires a missed approach climb gradient of **370 ft/NM** to **3500** feet.

The following conditions apply to this procedure:

- A minimum climb gradient of **370 ft/NM** to **3500** feet must be maintained during the missed approach procedure.
- The aircraft weight shall not be greater than that necessary to meet the published climb gradient on the missed approach.
- When computing the aircraft weight, corrections shall be made for the pressure altitude, ambient temperature, wind components and any gradient loss associated with a turn at the planned time of approach.
